Applications

## Application Examples

High efficiency, isolated, dual unregulated outputs

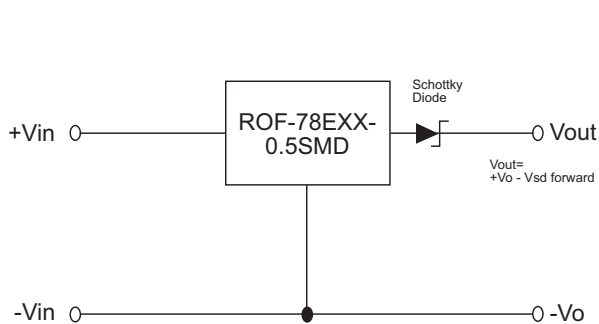

Isolated (Up to 6KV), wide input range regulated output

ROF-78E

## Optional Protection Circuit

Add a blocking diode to Vout if current can flow backwards into the output, as this can damage the converter when it is powered down.

The diode can either be fitted across the device if the source is low impedance or fitted in series with the output.

## Conduction / Radiation Emission Filter Suggestion

Suggestion for conduction Emission Class A, meet radiation emission Class B

The capacitors used are ceramic capacitors, rated voltage 50V
