Extender Cards – Prototyping Boards – Development Tools

Twin Industries Part# 2502-EXTM-LF

PMC Extender

Designed to allow testing PMC form factor cards which may not follow PMC signaling spec.

Designed for testing PMC cards on host system or test fixture. J/P 1-4 connectors installed.

Labeled 0.1" headers for all signals, allowing analysis with probe or logic analyzer.

Keyed for 3.3 and 5 volts.

Mounting holes included to allow secure attachment to single board computers.

Connectors have maximum stack height to allow for component clearance.

Lead-free assembly.
