SOLID STATE DIGITAL METER MODULES

700 SERIES

DESCRIPTION

Curtis Solid-State Module Assemblies are designed for OEM applications. Curtis offers a wide selection of miniature AC & DC meter assembly modules for PC board mounting applications.

700 – 703: Single-function 6-digit display for Counter or Hour Meter configurations.

708 & 721: Dual channel, 6 & 7digit display for Maintenance/

Hour Meter or Trip Odometer configurations.

720: Single channel 7-digit Odometer configuration.

APPLICATIONS

These models offer a variety of functions, sizes, voltages and customizable options to fit most applications. Ideal for OEMs, contract manufacturers, and panel makers for monitoring equipment usage, scheduling maintenance, warranty validation, rental/leasing use and more. Used extensively in industrial, agricultural, military & specialty vehicles, as well as applications such as: vending machines, medical & office equipment, fuel pumps, and consumer products.

FEATURES

- Selection hour meters, counters, odometers, maintenance monitors and more.
- Solid State Circuitry no moving parts to wear out. Silent operation and years of rugged & reliable operation.
- Crisp, clean readouts high-contrast 5 & 7mm LCD displays.
- Versatility compact module designs with high quality components to minimize space.
- AC/DC Configurations wide range of operating voltages & noise protection.
- OEM Compatibility an unparalleled selection of power compatibility, design configurations and functionality for OEM custom designs, panel makers and contract manufacturers.
- Distinctive Icons clear indicators for hour meter/timer activation and display modes.
- Backlighting available on all models (see model coding chart or consult factory).
- EEPROM memory nonvolatile, retention of data for as much as 25 yrs.+ without power.
- Manufactured under ISO 9001 Certified Quality Management System.
- Low power consumption.
- UL and CE recognized.

MODEL CODING ASSEMBLY MODULES 700, 701, 703

700	P	N	- 0	0	0
Model Number	Digit Height	Reset Control Options	Functions	Voltage	Reset/Backlight Configurations (1)
700 (6-digit) Hour Meter	P - 5mm digits	R - Wired Reset N - No Reset	0 - AC/DC (700 only)	0 - 5-12 VDC nom (4.75-15 abs) 6-12 VAC nom (5-15 abs)	0 - No Reset, No Backlight2 - Reset, No Backlight
701 (6-digit) Hour Meter	P7 ⁽²⁾ - 7mm digits		1 - DC only with wired Enable for Hour/Count (701&703 only)	1 - 12-48 VDC nom (9-60 abs) 20-60 VAC nom (15-75 abs) 2 - 48-150 VDC nom (36-185 abs) 100-230 VAC nom (75-287 abs)	 4 - Reset, External Backlight 5 - No Reset, External Backlight H - Reset, Internal Backlight (3) J - No Reset, Internal Backlight (3)
703 (6-digit) Pulse Counter			2 - AC/DC with wired Enable (701&703 only)	4 - 12 VDC only (9-15 abs) Backlight Options 4 & 5 only.	Tro Resel, memal backingm Cr

 All external backlight configurations - require 12 VDC (only) connection to illumination pin.
 7mm models - Backlighting only available as External.
 Available only in 5mm & with voltage option 4 only. NOTE:

MODEL CODING ASSEMBLY MODULES 708, 720, 721

708	P	R	- x x x x
Model Number (& Function)	Digit Height	Reset Control Options	Sequential Specification
708 (6-digit) Dual Channel Maintenance/Hour Meter 720 (7-digit) Single Channel Odometer	All Models P - 5mm digits	Model 708/721 R - Wired Reset for Maintenance or Trip Display Model 720 R - Wired Reset	Consult Curtis for: display format, voltages, connection termination, backlighting, pre-scaling and programming options.
721 (7-digit) Dual Channel Odometer/Trip Odometer

Accuracy	Hour Meters ± 0.1% Counters ± 1 count Odometers ±1 increment		(Models 700, 701, 708) (Model 703) (Model 720, 721)	
Humidity	95% Non-condensing at 38°C			
Operating Temperature	-40°C to + 85°C			
Storage Temperature	-50°C to + 85°C			
Operating Frequency (AC un	its) 48 to 44	40 Hz abs.		
Memory	Main power must be applied for 5 sec to activate memory (with no loss of time/counts). EEPROM-Data retention 25+ years without power present.			
Input Signal (DC Only)	Counter Maintenance Monitor Odometer Trip/Odometer	Model 720 - Varies depending on model configuration (consult factory).		
Input Signal (AC/DC)	Hour Meter Counter	Models 701, 708 - Power must be applied for 0.5 sec, min, to accumulate time. Model 703 - 1 Hz max, 50% duty cycle (500ms low, min, between consecutive high		
Reset	All Models Models 700, 701, 703 Model 708 Model 720 Model 721	Main power must be applied for a minimum of 0.5 sec. prior to reset signal. 6ms, min, at operating voltage. Maintenance 2 or 4 sec, factory programmed; hour meter not resetable. 70ms min at operating voltage. Trip channel 2 or 4 sec, factory programmed; odometer is not resetable. Note: Max Reset frequency is 150Hz for AC models.		
Notes:	 All modules are supplied with critical components exposed. If the module is being used in an environment other than specified, the user must take precautions to package the module to provide adequate protection. For proper mechanical support, all module pins should be soldered to the PC-board. To prevent heat damage to components, module face should be 10-20mm minimum away from PC-board when flow soldered. 			

CURRENT CONSUMPTION: (MA MAX)

MODULE WIRING GUIDE

Pin IDs	Assignment
Р	V+
N	V- (common)
1	Enable V+ to activate elapsed time (Optional on 701, 708, N/A on 700) or increment count (703, 720, 721).
R	Reset V+ to reset count/elapsed time to zero (720, Optional on 700, 701, 703) or resetable channel to zero (Models 708, 721).
L	Illumination Control - 12 VDC only (Optional, external backlight units only) 9-15 VDC absolute, regardless of operating voltage.

WARRANTY Two year limited warranty (see terms of sale for specifics).
