Model #: APSRM3

Remote Control Module - for Tripp Lite Inverters and Inverter/Chargers

Highlights

- Intuitive "traffic light" LED readouts
- Complete remote monitoring and control
- Versatile design for front panel, rear panel or below-dash mounting
- Master override capability
- Includes remote module, face plate, 25 ft. master override cord and 50 ft. remote control cord
- Click [here](#) to view a PDF of the product features.

Description

Tripp Lite's APSRM3 provides remote monitoring and control of select Tripp Lite Inverters (PV series) and Inverter/Chargers (RV, APS and EMS series) which feature an RJ-style connector. The remote module's compact housing includes a switch (which controls the operation of the connected Inverter or Inverter/Charger) as well as two sets of intuitive "traffic light" LEDs. One set of LEDs indicates the approximate charge level (high, medium or low) of user-supplied batteries connected to the Inverter or Inverter/Charger. The other set of LEDs indicates operational status and high wattage load level when used with an Inverter/Charger or wattage load level (high, medium or low) when used with an Inverter. Alternate LED labeling is provided. The module also includes mounting slots/holes for multiple mounting options (with user-supplied screws) including behind or below a dashboard or compartment. An attractive face plate is included for additional front-panel mounting options for RV, marine or vehicular detailing. A daisy-chain port links the module to an Inverter or Inverter/Charger with an included 50 ft. cord. The port also allows multiple modules (sold separately) to connect together to control a single Inverter or Inverter/Charger.

A Master Override Port enables automatic override of the Remote Control Module to shut off the connected Inverter or Inverter/Charger under various safety/operational conditions: * Ignition ON (prevents TV or other distractions while driving)* Ignition OFF (prevents inadvertent battery drain while parked)*Battery Disconnect (ensures safe shutoff when 12V electrical system is disconnected separately)* Water Encroachment (reduces shock hazard in marine applications)

Applications

- Ideal for remote monitoring and control of select Tripp Lite Inverters (PV series) and Inverter/Chargers (RV, APS and EMS series) which feature an RJ-style connector.

Package Includes

- Remote Control Module
- Face Plate
- 50 ft. Remote Control Cord
- 25 ft. Master Override Cord
- LED labels and Instruction Manual with Warranty Information

Features

- Provides complete remote monitoring and control of Tripp Lite Inverters (PV series) and Inverter/Chargers (RV, APS and EMS series) which feature an RJ-style connector
- Intuitive "traffic light" LEDs display a variety of operational information including battery charge level and load level
- Versatile, durable, all-metal remote module allows front panel, rear panel or below dash mounting
- Attractive face plate for additional front-panel mounting options for RV, marine or vehicular detailing

- Daisy-chain capability allows additional remote modules (sold separately) to control a single Inverter or Inverter/Charger
- Extra-long, 50 ft. remote cord allows you to locate remote module virtually anywhere within your vehicle or boat
- Master Override Port and included 25 ft. cable enable automatic override of the Remote Control Module to shut off the connected Inverter or Inverter/Charger under various safety/operational conditions
