Echelon Software License Generator/Turbo Edition
Model 34311

▼ Simple wizard interface for processing LNS® Device Credit orders from end users

▼ Enables LNS application developers to provide a complete, single point-of-service to end users

▼ Simple wizard interface for requesting new blocks of LNS Device Credits from Echelon

▼ Distributes LNS Device Credits to any LNS Server (Release 2 through Turbo Edition)
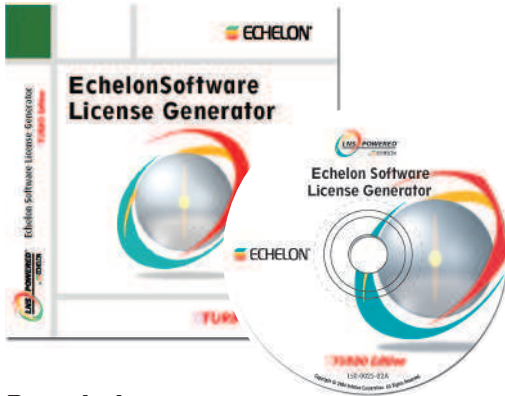

Description

The Echelon Software License Generator is an easy-to-use software package that enables an LNS application developer to distribute LNS Device Credits to end users. Each LNS Device Credit represents a pre-paid fee that allows an LNS application to commission or recover a LONWORKS® device. The Echelon Software License Generator is available for purchase by companies that have also purchased both the Model 34309 LNS Application Developer's Kit and the Model 34312 LNS Redistribution Kit products.

Overview

Licensees of the LNS Application Developer's Kit may distribute LNS applications without including an LNS Server redistribution. However, in many cases it is more convenient for the end user if an LNS Server is included with the application, and thus some LNS application developers will want to become licensees of the LNS Redistribution Kit. This Kit allows the LNS application developer to include LNS Server or LNS Remote Client redistributions in their products. When the LNS Server redistribution is installed onto an end-user's PC, a number of LNS Device Credits (64 to 512, as determined by the LNS Redistribution Kit licensee) are included as part of the installation.

If the LNS application developer also wishes to distribute more LNS Device Credits than are initially included with the LNS Server redistribution, the Echelon Software License Generator is also licensed.

The Echelon Software License Generator allows the LNS application developer to offer a single-source solution for distributing LNS applications, LNS Server redistributions, and LNS Device Credits to end-users. If an LNS application developer has not yet licensed the Echelon Software License Generator, their end-user's LNS Device Credit purchase requests are automatically directed to Echelon.

Credit Transaction

Once the end user has used the initial LNS Device Credits that come with an LNS Server distribution, more LNS Device Credits can be ordered by using the software wizard included with the LNS Server. The order is transmitted by email, fax, or telephone to the LNS Device Credit redistributor. The order is processed with the Echelon Software License Generator software and a software key is delivered back to the end user by email, fax, or telephone.

The key, when installed with the software wizard included with the LNS Server, adds the specified number of LNS Device Credits to the PC.

License

The Echelon Software License Generator may be licensed by LNS application developers who have also licensed both the Model 34309 LNS Application Developer's Kit and the Model 34312 LNS Redistribution Kit products. A minimum number of Model 34410 LNS Administrator Device Credits must be licensed with the Echelon Software License Generator. A single LNS Administrator Device Credit allows the LNS Device Credit redistributor to distribute up to 10 LNS Device Credits. The initial and subsequent purchases of LNS Administrator Device Credits are deposited into the Echelon Software License Generator software with an easy-to-use wizard that is included with the software. Contact your Echelon sales representative or distributor for details.

Specifications

License Generator PC Requirements
- Windows® XP, Windows 2000, or Windows Server 2003
- Pentium 100MHz or faster (Pentium III 500 MHz or faster recommended)
- 128 MB RAM (256 MB RAM recommended)
- 50 MB or more of free disk space
- CD-ROM drive
- Mouse or compatible pointing device
- 800 x 600 minimum display size
- Email or printing capability
