FLEXO® F6

- Easy, Cost And Labor **Effective Installation**
- More Flexible Than Split **Convoluted Or Spiral Wrap**
- 25% Edge Overlap
- Soft And Quiet In High **Vibration Uses**
- **Cut And Abrasion Resistant**
- **Chemically Inert**
- **■** Haloge Free

Material

Polyethylene Terepthalate

Grade

F₆N

Monofilament Diameter

.008" - .015"

Flexible, Semi-Rigid **Wrappable Split Braided Tube**

F6's unique split, semi-rigid braided construction makes it the ideal solution for situations where ease of installation is of primary importance. The lateral split allows the tube to open up to accommodate a wide variety of bundling requirements, and the semi-rigid braid configuration simply closes around the entire installation without the need for any additional fasteners (velcro, tape, etc.)

The PET braid is lightweight, quiet and flexible. The 25% edge overlap (at nominal diameter) allows coverage around inline plugs, connectors and splices.

F6 will bend to a tight radius without distorting or splitting open and, unlike full rigid tubing, will not impair or affect the flexibility of harnesses.

Colors Available:

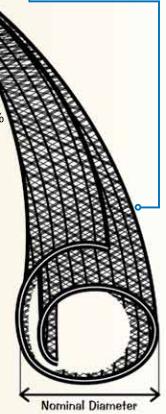

Black (BK), Orange (OR), & Clear/White (CW).

The large overlap allows easy installation over splices and incline connectors without exposing wires and cables.
