

GENERAL PURPOSE VIDEO FILTERS

SL...J SERIES STEEPNESS FACTOR 1.33

This range of 7-pole Elliptical Function low pass filters is similar to a type which has been successfully used in Broadcasting for many years but is offered in a 16 pin Single In Line package at reduced costs. The filters are corrected for group delay distortion over 95% of the passband and for loss distortion over the entire passband. Degradation of a composite video signal is minimal when a 4.5 MHz or 5.5 MHz filter is selected for a 525 or 625 line T.V. system.
