

Miniature Waterproof Shielded Connectors

LF Series

Mated dimensions

Short turn bayonet lock

Mating:

Insert the plug, and then turn the locking collar clockwise, as indicated by the coupling direction marking.

Un-mating:

Turn the locking collar counter-clockwise than pull off the plug.

■ Features

1. Ease of shielded termination and connector assembly

All components are self-aligning and do not require complex assembly tooling. The shield of the cable is connected with the metal housing of the connector using simple shielding clamp, supplied with the connector.

2. Water and dust protected

IP67 protection rating. Complete protection against dust penetration and against water penetration when mated assembly is submerged at the depth of 1.8 meter for 48 hours.

3. Bayonet lock

Short turn bayonet lock assures secure vibration resistant mating of the connectors.

4. High current rating capacity

Number of contacts	Current rating
3	5A max.
4	10A max.
6, 12 and 20	2A max.
11	10A max. 2A max.

5. RoHS compliant

All components and materials comply with the requirements of the EU Directive 2002/95/EC.

■ Applications

Sensors, robots, injection molding machines, NC, factory automation equipment, surveying instruments, measuring instruments, medical equipment, surveillance cameras and base stations.

Shielding Connection - Plug

Product Specifications

Rating	Voltage rating	125V AC, 175V DC (3 pos.) 125V AC, 125V DC (4 pos.) 30V AC, 42V DC (6 pos., 12pos., 20pos.) 125V AC, DC (11 pos. A to D) 30V AC, 42V DC (11 pos. 1 to 7)
	Current rating	5A max. (3 pos.) 10A max. (4 pos.) 2A max. (6 pos., 12pos., 20pos.) 10A(11 pos. A to D), 2A(11 pos. 1 to 7)
	Operating temperature range	-25°C to +85°C (Note 1)
	Storage temperature range	-25°C to +85°C (Note 2)

Item	Specification	Conditions
1.Contact resistance	15 mΩ max. (3, 6, 12, 20 pos.) 5 mΩ max. (4 pos.) 5 mΩ max. (A to D), 15mΩ max. (1 to 7)(11 pos.)	1A DC
2.Insulation resistance	1000 MΩ min.	500V DC (3, 4 pos.) 100V DC (6, 12, 20 pos.) 500V DC (A to D), 100V DC (1 to 7)(11pos.)
3.Withstanding voltage	No flashover or insulation breakdown.	1250V AC/one minute (3, 4 pos.) 300V AC/one minute (6, 12, 20 pos.) 1250V AC(A to D),300V AC(1 to 7) / one minute(11pos.)
4.Vibration	No electrical discontinuity for 10μs max.	Frequency: 10 to 500Hz, single amplitude of 0.75mm, acceleration of 98 m/s ² for 3 hours in 3 axis.
5.Shock	No electrical discontinuity for 10μs max.	Acceleration of 490m/s ² , 11ms duration, sine half-wave waveform, 3 cycles in each of the 3 axis.
6.Durability (Mating/un-mating)	30 mΩ max. (3, 6, 12, 20 pos.) 10 mΩ max. (4 pos.) 10 mΩ max.(A to D), 30 mΩ max.(1 to 7)(11pos.)	1000 cycles
7.Temperature cycle	Insulation resistance: 100 MΩ min.	Temperature: -55°C → Room temperature → +125°C → Room temperature Time: 30 → 10 to 15 → 30 → 10 to 15 (minutes) 5 cycles
8.Humidity	Insulation resistance: 10 MΩ min. (When temperature high) Insulation resistance: 100 MΩ min. (Dry state)	96 hours at temperature of 40°C and humidity of 90% to 95%.
9.Water / dust protection	When mated with corresponding connector.	Complete dust protection. No water penetration when submerged for 48 hours at the depth of 1.8 meter.

Note 1: Includes temperature rise caused by the current flow.

Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating temperature range and humidity range covers non-conducting condition of installed connectors in storage, shipment or during transportation.

Materials / Finish

Components	Material	Finish / Color	Remarks
Body / back shell	Zinc alloy	Nickel plated	_____
Insulator	PPS	Black	UL94V-0
Contacts	Copper alloy	Gold plated	_____
Gasket	Chloroprene rubber	Black	_____

		<p>③ Slide forward the seal bushing and insert it in the backshell until fully seated.</p> <p>④ Slide forward the strain relief collar and insert it in the backshell, making sure that the opposing protrusions fit inside the corresponding grooves, as shown on the illustration.</p> <p>Note</p> <p>It is critical that the protrusions are inside the corresponding grooves.</p>																												
		<p>⑤ Verify that the Loctite 7649 primer (or equivalent) on the threaded sections of the backshell and tightening collar are dry. Apply the Loctite 271 compound to the tightening collar's threaded section and attach it to the backshell.</p>

1. To maintain the water/dust protection performance and the cable clamp force, use a cable that is within the range of applicable diameter.
2. Consult HRS representative when using different cables.
