### Description

The OPB980 and OPB990 series of Photologic™ Photo Integrated Circuit Switches provide optimum flexibility for the design engineer. Building from a standard housing with a .125" wide slot, the user can specify (1) type and polarity of TTL output, (2) discrete shell material, (3) aperture width, and (4) choice of mounting configuration.

The electrical output can be satisfied as either TTL totem pole or TTL open collector. Either may be supplied with inverter or buffer output polarity. All have added stability of a built-in hysteresis amplifier.

### Absolute Maximum Ratings (T<sub>A</sub> = 25°C unless otherwise noted)

Supply Voltage, V <sub>CC</sub> (Not to exceed 3 sec.)	10V
Storage Temperature Range	-40° C to +80° C
Operating Temperature Range	-40° C to +70° C
Input Diode Power Dissipation	100mW <sup>(1)</sup>
Output Photologic™ Power Dissipation	200mW <sup>(2)</sup>
Total Device Power Dissipation	300mW <sup>(3)</sup>
Voltage at Output Lead (Open Collector Output)	35V
Diode Forward D.C. Current	40mA
Diode Reverse D.C. Voltage	2V

### Notes:

- (1) Derate linearly 2.22mW/° C above 25° C.
- (2) Derate linearly 4.44mW/° C above 25° C.
- (3) Derate linearly 6.66mW/° C above 25° C.
- (4) The OPB980/OPB990 series of switches are terminated with 24 inches of 7 strand 26 AWG, UL 1429 insulated wire on each terminal. Insulation colors and functions are:

RED - IRED Anode	WHITE - V <sub>CC</sub>
BLACK - IRED Cathode	BLUE - Output
	GREEN - Ground

Other wire lengths and/or colors in addition to customer selected connectors are available. Contact your local representative or call the factory.

- (5) Normal application would be with light source blocked, simulated by I<sub>F</sub> = 0mA.
- (6) All parameters tested using pulse techniques.

### Housing

All housings are an opaque grade of injection-molded plastic to minimize the assembly's sensitivity to ambient radiation, both visible and near-infrared. Discrete shells (exposed on the parallel faces inside the device throat) are either IR transmissive plastic for applications where aperture contamination may occur or opaque plastic for maximum protection against ambient light.
