General Description:

The **QRM250016X16CCFA000** is a matrix switch and switching subsystem that provides a complete 16x16 matrix switching solution in a 1 RU chassis. Q-ROUTE provides internal signal path redundancy by automatically re-routing around a failed signal path. Q-SENSE provides external signal path redundancy by automatic switching of back-up input signals. It is controllable either locally via the front panel keypad or remotely via computer and is compatible with most monitoring and control systems.
